WORK EXPERIENCE	
2004 - Present	<p>INDEPENDENT TRAINER/SECURITY CONSULTANT/AUTHOR Self-Employed Details</p> <ul style="list-style-type: none"> ?? Responsible for teaching certified networking, security, and programming courses to corporations around the country. Some of the most popular certified courses taught are Exchange 2003, SQL Server, ASP.NET, VB.NET, and Security+ ?? Coauthored the "A+ Certification All-In-One For Dummies" published by Wiley publishing in December 2006. Also authored the "Network+ Certification Study Guide, 3rd Edition" which was published by Mcgraw-Hill in November 2005. ?? As a security consultant I have performed security audits for companies identifying areas that need to be improved on the security side of networking. Assessed security related issues including product vulnerabilities and potential security risks with network implementations, making recommendations on improving the overall security of the network.
2003 - 2004	<p>TRAINER GigaBlink Technologies Inc. Details:</p> <ul style="list-style-type: none"> ?? Responsible for delivering successful networking, security, and programming courses to a number of corporate and government customers. These customers would bring a number of hands-on related troubleshooting questions to class with them, expecting to have a solution by the end of the training session. Topics included Visual Studio .NET, ASP, Windows 2000, Windows 2003, Exchange Server, SQL Server, and Security related courses. ?? As a developer, the first self-assigned task was to redesign the GigaBlink website from a static HTML site to a dynamic website using ASP technology, reading all related company service information from a database. The

	<p>accomplished goal of the new design was that 90% of the website data would be retrieved from a database, making it much easier to update the content. The redesign included a content management system for this site so that business users within the company could update the site through a number of administration pages.</p>
<p>2001 – Present</p>	<p>AUTHOR / TECHNICAL EDITOR Published author and technical editor for Wiley Publishing (formally Hungry Minds/IDG Books) and Osborne McGraw-Hill.</p> <p>Technical editor details:</p> <ul style="list-style-type: none"> ?? Worked closely with the Acquisitions editor (project leader) as a technical advisor to ensure that authors used clear, original, and technically accurate explanations. ?? During the editing process, responsibilities included providing professional comments and recommendations to authors on how to improve the material. These recommendations may be on how to better explain the content to make the topic easier to understand, or on adding additional elements, such as table and figures, to assist in the explanation. ?? Responsible for ensuring the overall objectives of the book were met. This includes tracking content covered and, more importantly, content that is not covered. Also responsible for tracking the page count and elements used such as figures and exam tips to ensure that the book does not go over budget. ?? Technical edited the following certification books: <ul style="list-style-type: none"> o <i>Mike Meyers' Windows 2000 Professional Passport</i> (Mcgraw-Hill) o <i>Mike Meyers' Security+ Certification Passport</i> (Mcgraw-Hill) o <i>CIW Foundations Certification Bible</i> (Wiley Publishing) o <i>MCSA All-In-One</i> (Mcgraw-Hill) o <i>Mike Meyers' Windows Server 2003 Environment Certification Passport</i> (Mcgraw-Hill) <p>Authoring Details:</p> <ul style="list-style-type: none"> ?? Designed and coauthored the <i>A+ Certification For Dummies All-In-One</i> which was published by Wiley publishing in December 2006. ?? Designed and authored the <i>Network+ Certification Study Guide, 3rd Edition</i> which was published by Mcgraw-Hill in November 2005. ?? Designed and coauthored <i>The A+ Certification Bible</i>, which was nominated for a Referenceware Excellence Award (see more) two years in a row (2003 and 2004) ?? Coauthored <i>Mike Meyers' Network+ Certification Passport, Second Edition</i> (Mcgraw-Hill) ?? Responsible for authoring chapters that have clear and accurate explanations while meeting strict deadlines that have been set by the project leader. ?? Responsible for incorporating changes recommended by copy editors, and technical editors that are in the best interest of the overall project.
<p>1997 – 2003</p>	<p>TECHNICAL TRAINER / NETWORK ADMINISTRATOR PBSC/Polar Bear</p> <p>Details:</p> <ul style="list-style-type: none"> ?? Delivered certified courses for Microsoft's <i>MCSE and MCSA</i> certification programs. Some of the topics delivered included Exchange 2000/2003, Windows 2000/2003, SQL Server 2000, Active Directory, Visual Interdev, and Visual Basic. ?? Also delivered curriculum for CompTIA's <i>A+</i> certification and <i>Security+</i> certification programs along with Prosoft's <i>Certified Internet Webmaster</i> certifications; including security courses for students to earn CIW's <i>Security Analyst</i> certification. ?? Designed a data driven web application that tracked instructor resources and the courses instructors were certified to teach. The initial prototype was quickly recognized as a tool that could quickly solve one of the training centers biggest business problems nationally and was deployed across the country. Proactively assembled a team of professionals (4 including myself), based off their skill set and role within the company, who were responsible for the success of the project.
<p>1994 – 1997</p>	<p>TECHNICAL TRAINER / NETWORK ADMINISTRATOR Keltic Inc.</p> <p>Details:</p> <ul style="list-style-type: none"> ?? Delivered certified courses for Microsoft's <i>MCSE</i> certification program. Some

	<p>of the topics I have delivered are Windows 95, Windows NT 4.0, Networking Essentials, Netware 3.12, Netware 4.1, and TCP/IP.</p> <p>?? Responsible for the successful upgrading of the company's Netware 3.12 network to a Netware 4.1 network.</p> <p>?? Later responsible for upgrading the Netware 4.1 network to a Windows NT 4.0 network as Microsoft networking was starting to get very popular.</p>

PRODUCT EXPERIENCE

Current Focus	<p>WEB APPLICATION DEVELOPMENT AND NETWORK SECURITY</p> <p>Over the last year few years I have shifted my focus to creating dynamic web applications using Microsoft technologies. The products I have worked with while exploring this large topic area include IIS 5.0, SQL Server, COM, COM+, ASP, Visual Interdev, and Visual Basic. I have successfully provided training on proper implementation and best practices for all of these technologies to numerous corporate clients in Atlantic Canada. I have implemented a number of successful projects using these technologies.</p> <p>As a security consultant I have worked on analyzing network infrastructures to determine possible security risks with the network. This includes review placement of firewalls, packet filtering rules enabled on the firewalls, and running vulnerability analysis programs to audit the network and it's resources.</p>
Other Products	<p>I have worked with many different technologies and products. In January of 2002 I was one of five trainers in Canada who were invited by Microsoft Canada to sit a course on Microsoft's Content Management Server 2001 product. These five trainers were to be the lead trainers across the country to promote the product.</p> <p>I have extensive experience with Windows NT, Windows 2000, Active Directory, SQL Server, ISA Server, and Microsoft's messaging product Exchange Server. With knowledge of all these technologies I have explored both the networking side of computing along with the development side. It is very exciting experiencing these technologies from both sides of the fence!</p>

EDUCATION

1992 - 1993	<p>COMPUTER PROGRAMMING AND SYSTEMS ANALYSIS</p> <p>CompuCollege School Of Business</p> <p>Details: In 1992 I enrolled in CompuCollege's Computer Programming and Systems Analysis diploma program where I learned programming languages such as Pascal, dBase IV and C.</p>
